

Summary

Full Stack MERN Developer with internship experience building scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and MySQL. Developed multiple production-ready projects and optimized application performance through REST APIs and database design. Passionate about backend development and currently expanding expertise in Go.

Education and Training

Bachelor of Technology : Computer Science University of Lucknow CGPA – 8.40/10	June 2026 Lucknow, Uttar Pradesh
--	--

Skills

Programming Languages: JavaScript, TypeScript, Java
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, Nest.js, REST APIs, Server-Side Rendering (SSR)
Databases & ORM: MongoDB, MySQL, PostgreSQL, Prisma ORM
Version Control & Tools: Git, GitHub, Postman, VS Code
Operating Systems: Windows, Linux (Ubuntu)
Cloud & DevOps: AWS (Basics), Docker, Redis

Experience

Full Stack Web Developer Intern Eniacworld Media Pvt. Ltd.	06/2025 to 09/2025 India
- Developed and deployed Trekking Mantra, a full-stack travel booking platform using Next.js, TypeScript, Node.js, MySQL, SSR, and SEO, enabling users to explore and book trekking, adventure, and group tour packages through a production-ready application. - Built end-to-end features including dynamic package management, image uploads, booking workflows, responsive UI, and RESTful API integration, delivering a seamless experience for both users and administrators. - Collaborated with the development team using Git, implemented reusable and maintainable components, and contributed to a live platform actively used by customers for booking adventure trips across Rajasthan.	

Web Development Intern VaultofCodes	06/2025 to 07/2025 India
- Developed responsive web modules using HTML, CSS, JavaScript, React.js, and REST APIs to build user-friendly interfaces. - Worked with MongoDB to design and integrate database features for web applications. - Collaborated using Git and GitHub while contributing to feature development and UI improvements in an agile team.	

Web Development Intern Future Intern	08/2024 to 09/2024 India
- Developed responsive web pages using HTML, CSS, JavaScript, and REST APIs following modern web development practices. - Worked with MySQL to design and integrate database features for web applications. - Used Git and GitHub for version control while collaborating on project development and bug fixes.	

Achievement

Smart India Hackathon (SIH)	09/01/24
- Developed Ferti-Smart, a data-driven fertilizer recommendation system selected in the internal hackathon round - Full-stack solution: built an end-to-end, robust, and efficient full-stack solution using HTML, CSS, and Python, and optimized it for scalability	
Prism Tech Fest	04/01/24
Participated in Prism, a tech fest organized by the University of Lucknow for the students to participate in different tasks/competitions and explore the tech world.	
Samsung Innovation Campus (SIC)	07/09/25
- Built a startup platform Innovate-Hub connecting entrepreneurs, mentors, and investors for pitching, funding, and collaboration. - Developed role-based features using Next.js, TypeScript, Node.js, Express, and MongoDB in a hackathon setting. - Collaborated in a team for rapid development, feature integration, and problem-solving under time constraints	

Projects

LU-Connect Placement Portal (Live Demo)
- Developed a centralized placement portal for final-year students, replacing scattered communication across WhatsApp and Google Forms with a structured system for job postings and applications. - Implemented role-based dashboards (Student & TPC) enabling TPC to manage company listings and students to apply seamlessly with stored profile data, eliminating repetitive form filling. - Built key features including job listings, Resume Analyser, and HR preparation modules using Next.js, TypeScript, Node.js, Nest.js, Prisma ORM, Clerk authentication, and Supabase.
Trekking Mantra - Trip and Adventure Booking Website (Live Demo)
- Designed and implemented an end-to-end travel booking platform for adventure trekking, group tours, and customizable trip packages using Next.js, TypeScript, Node.js, and MySQL during my internship at Eniacworld Media Pvt. Ltd. - Developed dynamic package creation modules with image uploads, tabbed UI, and interactive icons for adventure and group trekking bookings - Crafted a scalable, component-driven architecture using Tailwind CSS UI to ensure consistent design, responsiveness, and maintainability.
Swasth Raho Healthcare Platform (Live Demo)
- Built a scalable healthcare platform connecting patients, doctors, and hospitals through a unified system for appointments, medical records, and healthcare services. - Developed the application using Next.js, Node.js, Express.js, and MongoDB, implementing server-side rendering (SSR) to improve performance and search engine visibility. - Integrated AI-powered medical report analysis to help users understand health reports and receive automated health insights. - Implemented Google Maps API to help patients locate nearby hospitals and clinics, providing seamless navigation for offline medical consultations.
